

## SOME FREQUENTLY ASKED QUESTIONS ARE:

### WHAT IS A GLUCOSE MONITOR AND WHY DO I NEED ONE?

A continuous glucose monitor is a small device, about the size of a cell phone, that is worn for a number of days as specified by your doctor. It's attached comfortably with a flexible sensor and positioned slightly under the skin at the back of the hip. This is generally done in your doctor's office, but if it's more convenient, we will gladly schedule an appointment for this to be done by our technician in the convenience of your own home.

The monitor will record 288 continuous glucose readings throughout the day, providing your doctor with a level of detail about the highs and lows of your sugar levels that is far more accurate than any other method. The more information your doctor has about your condition, the more effective the treatment.

### BUT I DON'T HAVE DIABETES...DO I?

Many times diabetes occurs without symptoms or with a very gradual development of symptoms. Early diabetes symptoms can be so subtle, if you have any at all. In fact, you could have diabetes for months or even years and not know it. In the U.S. alone, more than 6 million people are unaware they have diabetes!\* Testing with a continuous glucose monitor can deliver accurate and timely information for your records.

### WHY DID MY DOCTOR CHOOSE TLC?

We have vast clinical experience with this type of continuous glucose monitor as well as the most exemplary personal service record. Once our technician attaches your monitor and confirms that it's working properly, you may go about your activities as usual. You are still required to maintain any daily regimen and medication as prescribed by your doctor. All information will be stored in your device for analysis until such time as the monitor is removed by your technician. The findings will then be reported to your doctor.

## GETTING STARTED WITH TLC

Your doctor has prescribed TLC's continuous glucose monitoring for you, and our goal is to provide information necessary for your treatment. We are delighted to be a part of your ongoing efforts to improve your health and well being. You'll find that our devices are easy to use (our technicians will explain everything!), reliable and discreet. Our advanced monitoring center is staffed 24/7 by highly qualified, certified professionals, so whatever your situation, you are never alone... we're always here, just a phone call away, at **(877) 869-4455**.

TLC has always been at the forefront of new developments in service and technology. Our experienced and knowledgeable technical staff provides exceptional care, peace of mind and round the clock monitoring for all your diagnostic needs.

You have the opportunity to be a partner in your own healthcare, and we encourage you to do so. Ask questions. Be involved. We agree with our doctors and believe all patients should be informed, curious and concerned.

When a patient calls, a **live person** answers the phone, **day or night**, ready to answer any questions they may have.

The pager-size monitor can clip to a belt or rest in a pocket.

## HOW TLC'S CONTINUOUS GLUCOSE MONITORING SERVICE WORKS

"IMPROVING YOUR HEALTH IS AS EASY AS 1-2-3"

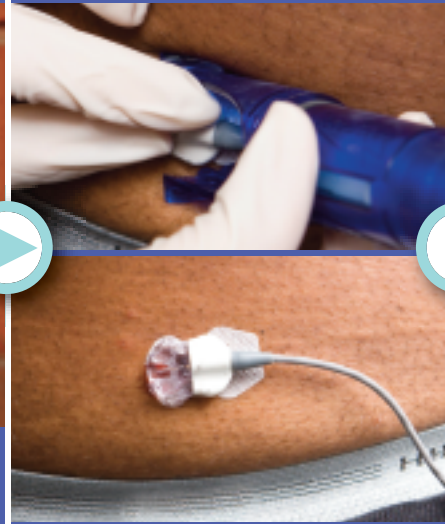

# 1.

Your doctor has prescribed a continuous glucose monitor (CGM) for you, and our TLC tech arrives to set up your test.

# 2.

Insertion of the mini-sensor is simple and easy.

# 3.

Your doctor discusses the test results with you.

**Convenience**—TLC technicians will see you at your doctor's office or in the convenience of your own home.

**Confidence**—You'll have the confidence of knowing that each person representing TLC is certified, experienced and professional.

**Caring**—Our people are very special. You'll notice the concern and caring from the first "hello". We wouldn't have it any other way.

Advancements in technology make our new sensors easy to insert and extremely comfortable.

Your TLC technician will explain how your device works and answer any questions you may have.

Your monitor will measure and store 288 readings every 24 hours! At the end of the testing period, all information will be sent to your doctor for analysis.

You've done something truly important by becoming a pro-active patient. Don't stop now.

When the testing period is over, your doctor will have valuable information about the high's and low's of your sugar levels.

Be an involved patient. Ask your doctor what else you can do to improve your health.
